

Project Architect - Grocery

Scott&Goble Architects (SGA), www.scottgoble.com, was founded in 1995 and has offices in Tulsa, OK, Bentonville, AR and Berkeley, CA. Since its founding, SGA has become an established leader in national retail architecture. By finding ways to add to our clients' knowledge and strengthen their business, SGA continually delivers the unique value that clients care about.

SGA provides comprehensive client services and an exceptional work environment for its people. SGA's culture and commitment to people has earned the company several regional and national awards. Among them are the 2007 Intern Development Program (IDP) "Outstanding Firm of the Year" presented by AIA and in 2008 the firm was recognized as the "Best Firm to Work For" in the nation by Architect magazine and industry consulting firm ZweigWhite.

Job Functions / Responsibilities

Focus areas:

1. Construction Documents - Develop detailed construction documents for national retail grocery store projects.
2. Change - Implement changes / updates to store prototypes.
3. Development initiatives - Research and present best options for materials, products and specifications.
4. Client Resource – Serve as a consultant / resource on grocery design and code compliance.
5. Innovation - Develop cost saving and sustainability initiatives for client projects.

Candidate Qualifications:

1. EDUCATION - Professional degree in Architecture, license preferred.
2. EXPERIENCE - Minimum of 5 – 7 years experience.
 - Prefer experience working directly with a major grocery store chain.
 - Related experience developing store prototypes for a national building program.
 - Prefer experience in a team environment where the focus is on developing the best product for the client.
3. TECHNICAL SKILLS – Proficient with AutoCAD and Microsoft Office.
